

JustiPlay Legal Document Report

Generated: 09 Jan 2026, 13:20

Document Summary

Document Type: Project Proposal

This document outlines a project proposal for 'JustiPlay,' a platform designed to bridge the gap between practical legal education for law students and public legal awareness for citizens. The platform utilizes AI-simulated legal scenarios, AI-powered document summaries, and human-supervised interactions to achieve its goals. It aims to address the lack of practical training in legal education and the difficulty citizens face in understanding legal documents. The solution incorporates features like AI mock hearings, skill-based evaluation, and document understanding tools. The project leverages Google Vertex AI, Gemini, Firebase Authentication, Cloud Firestore, and Google Cloud Storage.

Overall Risk Assessment: Low Risk

Risk Drivers

- Reliance on AI accuracy and ethical usage.
- Data privacy and security of user information.
- Potential for misinterpretation of legal information.
- Scalability and maintenance of the platform.

Clause-by-Clause Analysis

Clause	Risk Level	Educational Suggestion
--------	------------	------------------------

Problem Statement	Low	Understanding the problem statement helps to define the scope and objectives of the project.
-------------------	---	--

Solution Overview	Low	It's important to understand how the proposed solution addresses the identified problem.
AI Functionality	Medium	The role of AI is clearly defined to avoid potential misuse or misinterpretation. Consider the limitations of AI in legal contexts.
Document Understanding	Medium	Plain language summaries can help improve accessibility, but users should be aware of the potential for oversimplification.
Technology Used	Low	Understanding the technologies used can help assess the feasibility and scalability of the project.
Future Development	Low	Future development plans can provide insight into the long-term vision and potential of the project.
