JustiPlay Legal Document Report

Document Summary

Document Type: Project Proposal

This document outlines a project proposal for 'JustiPlay,' a platform designed to bridge the gap between practical legal education and public legal awareness. The solution uses AI-simulated legal scenarios to evaluate reasoning and communication skills of law students. It also provides AI-powered document summaries and risk analysis for citizens. The platform aims to offer a safe and structured environment for legal learning and understanding. Key features include AI mock hearings, AI-assisted interviews, and human-supervised document summarization.

Overall Risk Assessment: Low Risk

Risk Drivers

- Reliance on AI introduces potential risks of inaccuracies or biases.

- Data privacy and security concerns related to user data storage.

- Ethical considerations regarding the use of AI in legal contexts.

Clause-by-Clause Analysis

Clause	Risk Level	Educational Suggestion
Problem Statement	Low	Understanding the problem being addressed is crucial for evaluating the solution's effectiveness.
Solution Overview	Medium	The reliance on 'supervised AI' suggests a need to understand the nature and extent of this supervision.

AI Functionality	Low	Clarifying the AI's role as a monitor and evaluator can help manage expectations about its capabilities.
Document Understanding	Medium	The accuracy and reliability of these summaries and risk indicators are important considerations.
Human Oversight	Low	Understanding the specifics of this oversight can help ensure responsible AI usage.
Data Storage	Medium	Data storage practices should be reviewed to ensure compliance with privacy regulations.
